SkinnyOffice WorkSpace Overview

SUMMARY

Changing patterns of work are leading to employees needing to access your company IT resources from a variety of locations that include home, hotels, customer sites, and co-working offices. Just as the number of locations where work is being conducted is increasing; the number and type of devices that employees are using in the course of their work are increasing as well. This mix of diverse locations and devices presents challenges to providing uniform secure access to business and productivity applications, voice communications, peripherals, and printers while maintaining security.

SkinyOffice WorkSpace allows Small and Medium Sized business to meet these new workplace challenges with a complete fully managed private cloud IT infrastructure organized around Windows Virtual Desktops with Security, Communications, and Collaboration capabilities built in and ready to run alongside all of your critical business applications. All **SkinyOffice** WorkSpace subscriptions are fully managed and supported by the **SkinyOffice** Team allowing you to leave the IT administration burden to us.

Your employees are your company's most critical asset and **SkinyOffice** WorkSpace allows your business to support them with the technology and security that accelerates today's mobile workforce. This flexible and scalable virtual desktop solution breaks the cycle of traditional hardware and devices, allowing users to access apps and desktops from any device, anywhere, while securing and managing those devices regardless of location.

Simple

WorkSpace is simple to use and increases productivity across your organization. Users access their WorkSpace from any location on nearly any device.

Scalable

As is common with other cloud-based solutions, **SkinyOffice** WorkSpace enables organizations to quickly and easily scale as needed to meet business growth demands.

Supported

Focused on small and medium sized businesses **SkinyOffice** WorkSpace is a fully managed and supported solution. Let us be your IT Department or augment your existing IT team. Our Help Desk and Managed IT services give you the peace of mind you have been looking for.

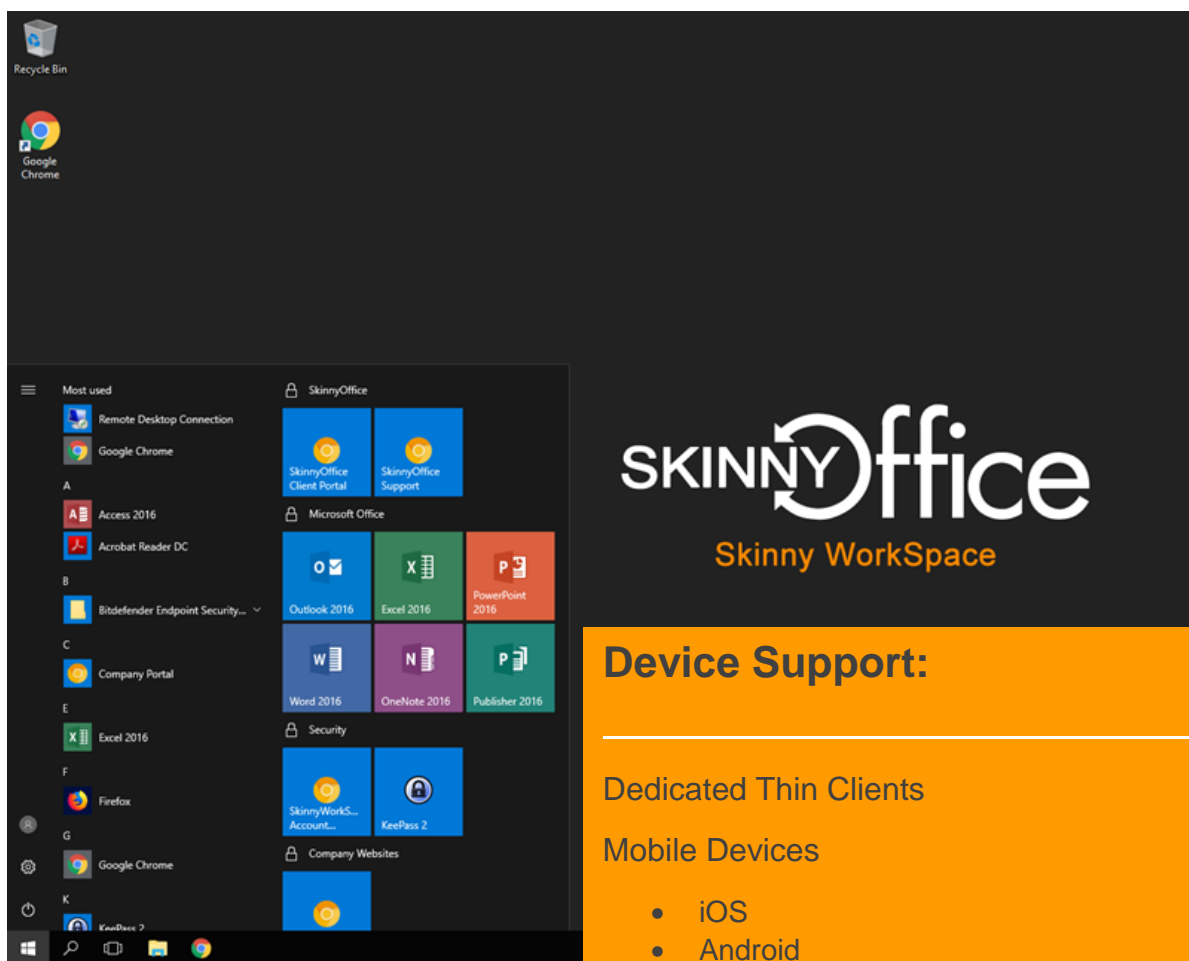

Secure

Secure connectivity ensures authenticated access from remote locations to the **SkinyOffice** cloud. Additionally, all data within WorkSpace environments is securely stored in one of our state-of-the-art data centers.

WORKSPACE: WINDOWS DESKTOP

SkinnyOffice Workspace gives every user access to a private cloud hosted Windows™ Desktop accessible from anywhere, at any time, on nearly any device using a dedicated client or inside of a browser. Each subscription includes access to the Microsoft Office suite of productivity applications.

Companies can easily and securely store their data inside this private cloud and deploy any additional business Desktop and Server based applications needed on their Workspace to allow users to access them when and where they are needed.

Device Support:

- Dedicated Thin Clients
- Mobile Devices
 - iOS
 - Android
- Chromebook
- Web Browsers (HTML5 Client)
- Windows Desktops and Laptops

WORKSPACE: SECURITY

All SkinnyOffice WorkSpace subscriptions include robust security protections to help you modernize your Information Security capabilities by creating a secure Digital Perimeter around your organization regardless of where you and your team are located.

Advanced Endpoint Protection: Protections against zero-day exploits, attacks, and inadvertent data leakage resulting from human error.

Network Protection: DNS based protection to transparently stop Internet based threats before they've even been able to cross into your private cloud.

Password Management: A secure password vault to help your team and users easily manage passwords for all of the applications and web sites they access. Additionally, users can be automatically notified if a credential they are using has been compromised in a known account breach.

User Password Self Service: This solution allows domain users to perform self-service password reset, self-service account unlock, employee self-update of personal details (e.g., mobile numbers and photos) in Microsoft Windows Active Directory.

Secure Remote Access: Safeguards sensitive data when applications are accessed from computers outside the corporate network.

WORKSPACE: PHONE

Robust Voice capabilities are available in SkinnyOffice WorkSpace subscriptions to help you reduce costs and modernize your company's communication and collaboration capabilities.

Voice: Private hosted Voice Over IP Phone system that supports both standard desk phones, cordless handsets, and “Soft Phones” able to run on Apple and Android mobile devices with features that include conferencing, dial by name directories, and “hot desking” for employees with non-dedicated office spaces.

Unified Messaging: Voicemail to Email capabilities to ensure messages reach your team on any device via an email which can be easily retrieved and forwarded to other recipients.

eFax: Send and receive electronic faxes securely from Email, Web and Multifunction Printer/Scanners.

Call Center: Contact Center capabilities are available to enable organizations to use Auto Attendants and Agent Queues to allow intelligent call routing and distribution enabling your business to better service and support your customers.

WORKSPACE: MOBILITY

SkinnyOffice WorkSpace has been designed to support the mobility demands of modern businesses. Small and Medium sized organizations need the same abilities as their larger counterparts; such as secure sharing and collaboration of internal documents, Instant Messaging, Email, and remote access to internal company resources.

SkinnyOffice WorkSpace meets these requirements by providing integrated Email and Instant Messaging access, remote printing, Web and mobile content collaboration and sharing all accessible from your WorkSpace desktop and beyond.

Enterprise Class Content Sharing and Collaboration: The WorkSpace Content Collaboration app unifies your internal and external file access and sharing processes allowing you to access your files using traditional file shares or with Web and Mobile interfaces to allow secure external collaboration and editing without the need for VPN or FTP access.

WorkSpace users can leverage advanced record management capabilities to classify and search for their documents by name, tag, and detailed index information such as account number or address allowing for the organization of large stores of previously unmanaged data.

Email: All WorkSpace subscriptions come with Microsoft Exchange mailboxes for each subscriber; providing users with robust business class email and calendaring capabilities using your company's own domain name, allowing you to enjoy a professional appearance with email@your-domain addresses. Advanced capabilities include shared calendars and contact lists and the ability to send encrypted emails and attachments to external recipients.

Remote Printing: Let your team enjoy the freedom and simplicity of printing to company printers anywhere from any device. Users can print from WorkSpace Desktops, Email to print, and upload documents to printers securely from the Web. WorkSpace Remote Printing allows for simplified printing from employee owned mobile devices without concern for drivers or complicated remote access solutions.

Instant Messaging and Conferencing: Skype for Business lets users conduct Instant Messaging conversations, and Web, Audio, and Video conferencing from nearly any device. Meetings and IM conversations can be scheduled and launched from inside of Microsoft Outlook with the ability for external users to join in from mobile devices and telephones.
